

AI Security Assurance, LLC

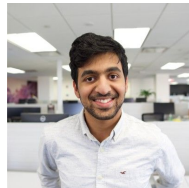

Accelerating Delivery of Trustworthy Systems

Lori Pickering

CEO & CFO

Systems-theoretic process analysis (STPA), formal verification for security, graph learning, ML/AI engineering. MS computer science, MS biomedical forensic science. BS physics & applied computational mathematics.

Alvin Kuruvilla

CTO & CISO

Cybersecurity, security architecture, ML/AI security workflows, secure by design, software code analysis. MS computer science. BS computer science & cybersecurity. Comptia Security+ certification.

Jack Vining, Ph.D.

Chief Scientific Officer (CSO)

Quantum computing, graph theory, combinatorics, topology, software code analysis, formal methods, software engineering. PhD computer science. MS mathematics. BS computational mathematics.

New Member

Chief AI Officer – TBD

AI Engineering, multi-agent workflows, RAG, full-stack production software engineering, UX, cybersecurity

Systems-theoretic security is well known to systems engineers and almost unknown to software engineers — we live in both worlds, plus formal methods and AI.
